

## A Great Day With Microsoft and Friends...

Nearly seventy IT professionals turned out for Synegi's **Microsoft Bus Across America Event** on March 2 in Irvine. The product demos - and more importantly the engineering talent - that Microsoft generously provided offered a rare opportunity to exchange ideas with the development and product teams driving some of Microsoft's most exciting new products. Inside Synegi's doors guests participated in product demos from other vendor partners and took advantage of the informal setting to discuss issues of particular interest to their business. At the end of the day, Microsoft's Robert Macias drew the door prize winners, whom we are pleased to announce below:

Hien Duong from Advanced Medical Management, Inc  
**An Xbox360 – Courtesy of Microsoft**

Jim LeLeux from Shur-Lok, Inc  
**A \$100 Best Buy Gift Card – Courtesy of Double Take**

Doug Darby of Pioneers Memorial Healthcare  
 Special prize to the guest who came from farthest away (Brawley, CA)  
 A Server/Client license of **Data Protection Manager – Courtesy of Synegi**

Synegi is dedicated to helping our customers make more informed technology decisions, drawing on our experience as the leading high availability/disaster recovery integrator on the West Coast. Part of that mission is keeping abreast of the technology curve and guiding customers to those solutions we consider offer exceptional benefits in terms of cost, performance and simplicity. Hence Synegi's close association with Microsoft's Incubation Sales Division and the other innovators noted below. We extend our thanks to these partners for their participation in this event. Most importantly, we thank our customers and invited guests, whose participation made the event a success.
